State-of-the-art softness

STAINMASTER® EverSoft® SDN carpet is made from an advanced fine denier fibre, creating incredible softness. Unlike many SDN fibres which are made of bulky individual filaments, STAINMASTER® EverSoft® SDN carpet is made of individual filaments that are much finer, and therefore softer.

Hard wearing fibre provides durability

STAINMASTER® EverSoft® SDN carpet is engineered to withstand years of the usual wear and tear that comes with everyday living. Designed to resist fibre loss from abrasive wear, your carpet will stay looking soft and luxurious for years.

Soiling resistance technology

Soiling resistance technology helps to reduce dry-soil accumulation on STAINMASTER® EverSoft® SDN carpet, limiting the ability of it to stick to the fibre.

Anti-static protection

Every STAINMASTER® EverSoft® SDN carpet contains special carbon-core fibres that act like thousands of microscopic lightning rods, controlling static for the life of the carpet.

Easy to clean thanks to stain resistance technology

Specially formulated stain blocking technology is built into STAINMASTER® EverSoft® SDN carpet during the manufacturing process and helps to prevent staining from food and drink spills.

Colourfast fibre provides protection against fading

The fibre used in STAINMASTER® EverSoft® SDN carpet is manufactured with advanced fade resistant technology which has been specially developed to resist fading from sunlight and the harmful effects of ultra violet light and airborne contaminants such as ozone. This ensures that your carpet maintains its vibrant colour longer.

*Enjoy sunny rooms
without the fear of fading.*

*Keep the outside world outside
and not stuck to your carpet.*

*Relax and enjoy the show
with an inside picnic*
